

METHOD OF COATING COILS USING A HIGH SOLIDS  
FLUOROCARBON COATING COMPOSITION

**ABSTRACT OF THE DISCLOSURE**

A coating composition which includes an aminoalkyl (meth)acrylate containing acrylic polymer, a fluorocarbon polymer and a solvent. The acrylic polymer includes at least one (meth)acrylate monomers and an aminoalkyl (meth)acrylate monomer described by the structure:

where Z is a divalent linking group; R<sup>2</sup> and R<sup>3</sup> are independently selected from H or C<sub>1</sub>-C<sub>6</sub> linear or branched aliphatic; and R<sup>4</sup> is H or CH<sub>3</sub>. The fluoropolymer coating composition may be applied using coil coating, spray coating or extrusion coating methods to an appropriate substrate.
